

Those who are signing up for the do not call list are doing so because because they do not want to be bothered with these annoying calls. If I wanted to receive these calls I would not have signed up for the list. What sense does it make to do away with a list that so many want. If the calls were wanted then the list would not be so popular. I do not want to be bothered! I do not want to be called! I pay for my phone and I should be able to sign up for a list that stops calls that I do not want to receive. I the telemarketers do not want the lists and want the ability to call me then let them pay for my phone bill. Until then I DO NOT WANT TO BE CALLED!!!!!!!!!!!!!!
